

Flossbach von Storch - Global Quality - F²

INVESTMENT STRATEGY

Flossbach von Storch - Global Quality is a global equity fund with an active, focussed investment approach. The focus is on long-term holdings in companies (real value concept), not short-term speculation. We therefore focus on the quality of the company, which is determined by the strength and predictability of the expected earnings performance. We value a strong and sustainable competitive position, a healthy balance sheet, attractive target markets and management with integrity and competence. High-quality companies tend to have above-average returns on invested capital and strong resilience to adverse developments. All investment decisions are based on a sound assessment of quality and valuation. We understand risk as an economic dimension, i.e. the danger of a permanent loss of capital as opposed to short-term fluctuations. Other in-house valuation models include ESG issues, engagement, and voting. In addition, exclusion criteria defined within the framework of the Sub-Fund's investment policy are taken into account.

The Sub-Fund is actively managed. The portfolio is composed by the fund manager exclusively in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. The performance of the Sub-Fund is compared using the MSCI World Net Total Return Index as a benchmark. The fund manager is not linked to the index at any time when making investment decisions and the portfolio composition. Therefore, the performance of the Sub-Fund may differ significantly from the benchmark shown. The Sub-Fund is categorized as an Article 8 product under the Disclosure Regulation (EU) 2019/2088 (SFDR). For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Information Document (PRIIP-KID).

EXPLANATORY NOTES REGARDING PERFORMANCE

Past performance is no indication of current or future performance. The performance data do not take into account the commissions and costs incurred in the issue and redemption of units, which may reduce the performance. Exemplary model calculation assuming a front-end load of 5%: an investor wishes to purchase units for 1,000 EUR (or CHF). With a maximum front-end load of 5%, he must pay a one-time fee of EUR 50 (or CHF) on purchase. Custody account costs may also be incurred. Please refer to the cost details presented in this document to determine the maximum front-end load for the unit class of the subfund. Where performance is compared to a benchmark, such a comparison is provided for information purposes only and does not imply any obligation on the part of the fund manager to achieve the level of the benchmark or replicate its performance.

Flossbach von Storch - Global Quality - F

OPPORTUNITIES

- + These funds aim to exploit growth opportunities on global equity markets.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
- + Derivatives can be used to increase potential yields.

RISKS

- Equity markets and thus also unit values can experience severe fluctuations in response to market developments. The result can be a fall in the trading price. ESG criteria can restrict the selection of target investments in terms of category and number, sometimes considerably.
- Investing in assets denominated in a foreign currency can have a negative impact on unit values as a result of exchange rate movements.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net sub-fund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Long-term: over 5 years

RISK INDICATOR

Lower risk ← Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Unusual market conditions could arise, for example, due to currency, creditworthiness, price, counterparty, liquidity and interest rate risks, as detailed in the sales prospectus.
