

# Flossbach von Storch - Global Convertible Bond - R

## INVESTMENT STRATEGY

The Flossbach von Storch - Global Convertible Bond represents a defensive alternative to pure equity investments. The convex profile of convertible bonds enables investors to profit from rising prices on the equity market while at the same time limiting price risks. Security selection is based on a fundamental analysis process using in-house valuation models. If no convertible bond is available for an underlying security that appears attractive, or if its structure does not match the desired profile, the fund management can combine bond and call option to present a similarly attractive structure. Other in-house valuation models include ESG questions, engagement, and voting. In addition, exclusion criteria defined as part of the Sub-Fund's investment policy are taken into account. Foreign currency risks are currently largely hedged. The fund invests globally in convertible bonds. The Sub-Fund is actively managed. The portfolio is composed by the fund manager exclusively in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. The performance of the Sub-Fund is compared using the UBS Thomson Reuters Global Focus Hedged Convertible Bond Index as a benchmark. The investment manager is not linked to the Index at any time when making investment decision and the portfolio composition. Therefore, the performance of the Sub-Fund may differ significantly from the reported benchmark. The Sub-Fund is categorized as an Article 8 product under the Disclosure Regulation (EU) 2019/2088 (SFDR). For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Information Document (PRIIP-KID).

## ANNUAL PERFORMANCE IN EUR (IN %)

## EXPLANATORY NOTES REGARDING PERFORMANCE

**Past performance is no indication of current or future performance.** The performance data do not take into account the commissions and costs incurred in the issue and redemption of units, which may reduce the performance. Exemplary model calculation assuming a front-end load of 5%: an investor wishes to purchase units for 1,000 EUR (or CHF). With a maximum front-end load of 5%, he must pay a one-time fee of EUR 50 (or CHF) on purchase. Custody account costs may also be incurred. **Please refer to the cost details presented in this document to determine the maximum front-end load for the unit class of the subfund.** Where performance is compared to a benchmark, such a comparison is provided for information purposes only and does not imply any obligation on the part of the fund manager to achieve the level of the benchmark or replicate its performance.

## MONTHLY COMMENTARY

The announcement of global 'reciprocal' import tariffs by US President Donald Trump on his self-proclaimed 'Liberation Day' led to a sell-off on the equity markets at the beginning of the month. Losses were particularly heavy in the USA, with the Nasdaq 100 losing more than 5% of its value on 3 April. In anticipation of possible counter-tariffs and a potential global recession, stock markets extended their losses, with most global indices losing more than 10% in just a few days. It was only after Trump announced that he would postpone the introduction of tariffs for 90 days (with the exception of China) and instead impose a temporary global tariff of 10% that the markets gradually recovered. Several comments suggesting a rapprochement in the trade dispute between China and the USA also helped to calm the situation. By the end of the month, the stock markets had recovered – despite a noticeable deterioration in the global tariff environment (returns including dividends: MSCI World: +0.9%; Nasdaq 100: +1.6%; S&P 500: -0.7%; Russell 2000: -2.3% (all in US dollars); STOXX Europe 600 (in euros): -0.5%; Nikkei 225 (in Japanese yen): +1.2%; Hang Seng (in Hong Kong dollars): -4.0%). In response to the uncertainty caused by the US tariff policy, there were also shifts in the bond market. Contrary to the usual safe haven pattern, investors increasingly withdrew from US Treasuries during the stock sell-off. Concerns about tariff-induced inflationary impulses in the USA and a possible decline in demand for US Treasuries in the future weighed particularly on long-term Treasuries, causing the US yield curve to steepen. This development was further exacerbated by Trump's verbal pressure on US Federal Reserve Chair Jerome Powell to cut interest rates. German Bunds benefited from the shift, recording significant price gains as a result of falling interest rates. The flight from US capital was reflected in April in a significant depreciation of the US dollar against the euro. In the Fund, we used the temporary weakness on the markets to make targeted purchases, thereby keeping the delta constant at a low level. The Fund was able to participate in the subsequent recovery phase, whereas we reduced the delta again slightly by taking proportionate profits. As a result, the Fund recorded a positive performance of 0.7 % in a turbulent reporting month. For the year to date, the Fund's value has thus increased to 4.1 %. The equity sensitivity at fund level (including cash, equity derivatives and bonds) stood at 34.5% at the end of April, while the delta of the convertible bonds in the Fund was 36 %.

# Flossbach von Storch - Global Convertible Bond - R

OPPORTUNITIES

- + Investing in funds can deliver an attractive result at a lower level of risk compared to a direct investment in equities.
- + Income can be generated from regular interest payments.
- + Convertible bonds can increase in value when equity markets rise.
- + Derivatives can be used to increase potential yields.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.

RISKS

- Investing in convertible bonds may entail price risks, especially in the case of rising interest rates on the capital markets.
- Convertible bonds can decline in value when equity markets fall.
- Country, credit and issuer liquidity risk. Also potential exchange rate risks. If securities are illiquid (i.e. thinly traded), there is a risk that it may either not be possible to sell the assets at all or only by accepting a significant discount on the sale price. ESG criteria can restrict the selection of target investments in terms of category and number, sometimes considerably.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).
- The straight concentration on special markets can have a negative impact because of the dependent performance of these selected markets.
- Investing in assets denominated in a foreign currency can have a negative impact on unit values as a result of exchange rate movements.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

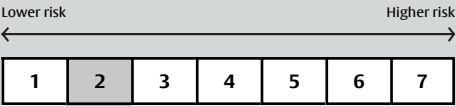

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net sub-fund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Long-term: over 5 years

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.
