

# Flossbach von Storch - Foundation Growth - R

## INVESTMENT STRATEGY

The Flossbach von Storch - Foundation Growth Sub-Fund offers professional asset management to foundations and other responsible investors. The growth-oriented multi-asset strategy is designed to generate attractive returns while preserving the substance of the assets over the long term. The fund management invests globally in equities (maximum 75 per cent), bonds, convertible bonds, currencies, gold (indirectly) and investment funds according to the principle of risk diversification. Derivatives may be used to hedge or optimise returns. The investment strategy includes in-house valuation models, ESG integration, engagement, and voting. In addition, exclusion criteria are taken into account that are based on a broad consensus of values. For example, the fund management refrains from investing in companies that are associated with the production and distribution of controversial weapons, or that generate significant revenues from military weapons, thermal coal, tobacco, alcohol and gambling. Also excluded are companies that seriously violate the principles of the UN Global Compact initiative these include human rights, labour standards, environmental protection, and anti-corruption. When selecting government bonds, no issuers are considered that are classified as "not free" by Freedom House.

The Sub-Fund is actively managed and not benchmarked against an index. The portfolio is composed by the fund manager exclusively in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. The Sub-Fund is categorized as an Article 8 product within the meaning of the Disclosure Regulation (EU) 2019/2088 (SFDR).

For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Information Document (PRIIP-KID).

## EXPLANATORY NOTES REGARDING PERFORMANCE

**Past performance is no indication of current or future performance.** The performance data do not take into account the commissions and costs incurred in the issue and redemption of units, which may reduce the performance. Exemplary model calculation assuming a front-end load of 5%: an investor wishes to purchase units for 1,000 EUR (or CHF). With a maximum front-end load of 5%, he must pay a one-time fee of EUR 50 (or CHF) on purchase. Custody account costs may also be incurred. **Please refer to the cost details presented in this document to determine the maximum front-end load for the unit class of the subfund.** Where performance is compared to a benchmark, such a comparison is provided for information purposes only and does not imply any obligation on the part of the fund manager to achieve the level of the benchmark or replicate its performance.

Storch since 2012.

GENERAL SUSTAINABILITY APPROACH AT  
FLOSSBACH VON STORCH

Flossbach von Storch acts according to a comprehensive understanding of sustainability and integrates ESG (Environment, Social and Governance) factors firmly into its proprietary investment process. The in-house research department thoroughly examines the quality of each new investment idea on the basis of a fundamental company analysis. Only if a company generates returns in the long term and there are no serious ESG conflicts does an investment idea become a potential investment. In this context, particular importance is attached to long-term corporate governance (G) with integrity. It allows conclusions to be drawn about the observance of all ESG factors.

You can find more information on the topic of sustainability at:

[www.fvsinvest.lu/investing-sustainably](http://www.fvsinvest.lu/investing-sustainably)

SUB-FUND SPECIFIC EXCLUSION CRITERIA

- Outlawed weapons (revenue threshold > 0%)
- Weapons (revenue threshold > 10%)
- Tobacco production (revenue threshold > 5%)
- Alcohol production (revenue threshold > 5%)
- Gambling (revenue threshold > 5%)
- Coal (revenue threshold > 30%)
- Companies that have committed serious violations without a positive outlook for the UN Global Compact (human rights, labour standards, environmental protection and corruption).
- No investments are made in government bonds whose issuers are classified as 'not free' by Freedom House.

# Flossbach von Storch - Foundation Growth - R

OPPORTUNITIES

- + Flexible investment policy without benchmarking.
- + Risk is broadly diversified by investing in a range of asset classes (e.g. equities, bonds, convertible bonds, and precious metals [indirect]). Market potential can be exploited by investing across a wide range.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange-rate movements.
- + Derivatives can be used to increase potential yields.
- + Precious metals [indirect] (e.g. in the form of gold) can be used to increase potential yields.

RISKS

- Market risks: the securities in which the Management Company invests the sub-fund assets present opportunities for gain but also the possibility of risk. The ESG criteria restrict the selection of target investments in terms of category and number, sometimes considerably. If a sub-fund invests directly or indirectly in securities and other assets, it is subject to many general trends and tendencies on the markets, which are sometimes attributable to irrational factors, particularly on the securities markets. Losses can occur when the market value of the assets decreases against the cost price. If a unit holder disposes of units in a sub-fund at a time when the quoted price of the sub-fund assets is less than at the time of investment, then the unit holder will not recover the full value of the investment. While each sub-fund constantly strives to achieve growth, growth cannot be guaranteed. The risk exposure of the investor is, however, limited to the sum invested. There is no obligation to make additional capital contributions beyond investors' investments.
- Currency risks: if a sub-fund holds assets which are denominated in foreign currencies, it shall be subject to currency risk. In the event of a devaluation of the foreign currency against the reference currency of the sub-fund, the value of the assets held in foreign currencies shall fall.
- Credit risks: the fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.
- Interest-change risks: investing in securities at a fixed rate of interest is connected with the possibility that the current interest rate at the time of issuance of a security could change. If the current interest rate increases as against the interest at the time of issue, fixed-rate securities will generally decrease in value. Conversely, if the current interest rate falls, fixed-rate securities will increase.
- Risks relating to the use of derivatives: the fund may enter into derivative transactions for the purposes listed in the key information document (PRIIP-KID) and the sales prospectus. This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Risks of precious metals and commodities: precious metals and commodities may be subject to greater price fluctuations. Trading prices may also fall.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net sub-fund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Long-term: ≥ 5 years

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. Unusual market conditions could arise, for example, due to currency, creditworthiness, price, counterparty, liquidity and interest rate risks, as detailed in the sales prospectus.
